

Two Japan internships worth applying for

A practical CodeForSuccess guide for Indian engineering students, recent graduates and research-minded applicants.

PROGRAM	OIST Research Internship	HENNGE GIP - Full-Stack
Where	Okinawa, Japan	Tokyo, Japan
Type / length	Lab research / 4-6 months	Engineering training / 4-6 weeks
Application timing	15 Oct 2026, 23:59 JST Spring 2027 intake	Rolling, limited slots; check available batches. 30 Sep is not a universal official deadline.
Financial support	Flight, funded furnished accommodation, ¥2,400 per working day	Unpaid; flight and living subsidy, visa guidance
Best fit	Research or future PhD interest	Strong full-stack and cloud candidates

Choose your track

OIST: Pick a lab and show a genuine research match. A CSE degree can fit computational or mathematical science projects.

HENNGE: Demonstrate working projects and relevant Python, Go or TypeScript/React/Vue experience. Basic DSA alone is unlikely to meet its listed requirements.

Apply only on the official program pages. Benefits and availability can change; verify before submitting or publishing a reel.

01 OIST Research Internship

Okinawa Institute of Science and Technology • Spring 2027 intake

Dates and eligibility

- Apply by 15 October 2026, 23:59 Japan time (20:29 IST). Results are expected mid-December. Internship dates fall between 1 April and 30 September 2027; each placement lasts 4-6 months.
- Eligible: final two years of a bachelor's degree by internship start, any master's year, or holders of a bachelor's or master's degree. Students need approval from their home institution. Current or graduated PhD students are ineligible.

Funding and project fit

- One direct round-trip flight, furnished accommodation funded by OIST or the research unit, ¥2,400 per working day, shuttle pass and visa/CoE administrative support.
- Choose relevant available faculty or projects. Selection depends on research fit, academic background, funding and space. This is a research placement, not a general software development internship.

Prepare before applying

- Academic transcripts and diploma, or enrollment certificate if still studying; CV; a statement of purpose of at most 250 words / 1,500 characters.
- One to three English recommendations from professorial-level faculty. At least one letter must arrive in the system before submission. Passport details and a recent photo; another government ID may be uploaded if a passport is unavailable at application time.
- English test scores are optional. Application fee: ¥5,000, non-refundable.

How to apply

1. Review OIST research units. 2. Create an account via the official Apply Now button. 3. Upload English PDF documents, request faculty recommendations and pay the fee. 4. Submit before the JST deadline.

02 HENNGE Global Internship

Full-Stack Pathway • Onsite in Tokyo • English-speaking team

What the internship includes

- Four to six weeks, generally Monday-Friday, 10:00-19:00 JST. Weeks 1-3: full-stack app project; week 4: DevOps and infrastructure; weeks 5-6: a conditional special assignment.
- This is unpaid with subsidies. HENNGE lists round-trip airfare, a monthly living subsidy intended for accommodation and ordinary expenses, visa guidance, and medical insurance for interns from outside Japan. Interns arrange their own accommodation.

Who should apply

- Third-year undergraduates or above, master's/doctoral students and recent graduates; CS or related degree, or equivalent technical experience. Fluent English; Japanese is not required.
- Proficiency in Python, Go or React/Vue with TypeScript; comfort with Linux/macOS/Unix. For the full-stack pathway, meet at least three of: cloud/AWS, full-stack development, distributed systems, DevOps/CI/CD/IaC, containers/Docker.
- International candidates can apply; HENNGE describes visa assistance for people who need entry visas. Interest in a future career in Japan is listed.

Application and timing

- Register and verify email; choose Full-Stack; complete the coding challenge; upload CV and cover letter; enter batch preferences; shortlisted applicants attend HR and online interviews.
- The coding challenge has no time limit and speed is not used for screening. Applications are reviewed as received and a batch may close when full. Do not claim an official 30 September deadline for all applicants.
- Outstanding interns may be considered for full-time roles; there is no guaranteed job offer.
