

BHASKAR YOGI

Web Developer

A-95/4C,jamnapuri murlipura jaipur | shardayogi60@gmail.com | 9116978158

CAREER SUMMARY:

Hi, I'm Bhaskar Yogi — a BCA student and aspiring full stack developer. Currently focused on building real-world projects using React, Node.js, Tailwind CSS, MongoDB, Express.js and improving my DSA skills.

PROJECTS

QuickGPT

React, Tailwind CSS, Node.JS, MongoDB, Prism.JS, Express.JS, Stripe, Axios

- AI-powered MERN app where users can sign up and generate text and images using Gemini AI. Includes JWT authentication, ImageKit integration for image handling, and a Stripe-based credit system for purchasing usage. Built for real-world full-stack deployment.

QR Code Generator

HTML, CSS, JavaScript

- A simple and responsive QR Code Generator built using HTML, CSS, and JavaScript. Users can instantly generate QR codes from any text or URL, download them, and even switch between light and dark mode.

Text to Speech Converter

HTML, CSS, JavaScript

- A clean and simple Text-to-Speech (TTS) web application built using HTML, CSS, and JavaScript. This project converts user input text into spoken audio using the browser's Web Speech API.
